

Land Formation Card Instructions

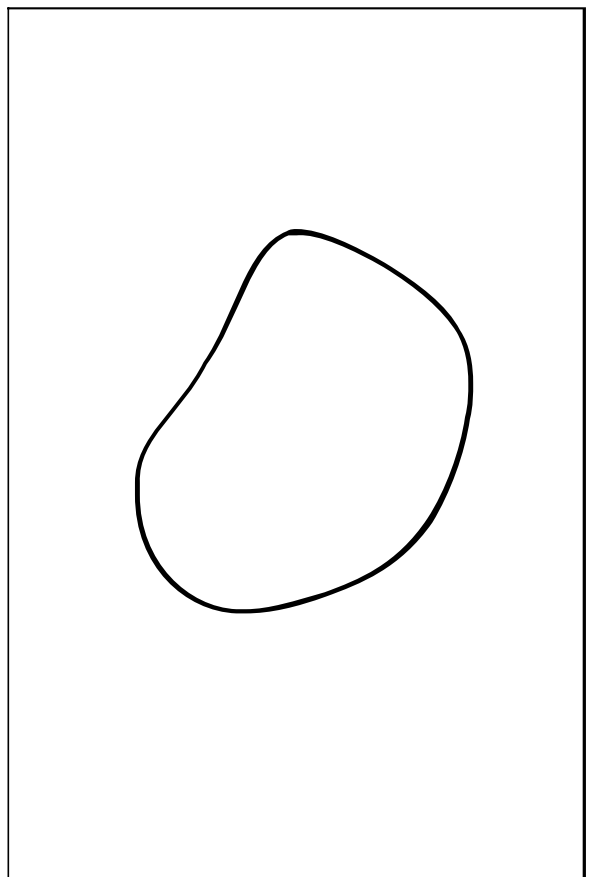

1. Watch Video 1 for Land, Water, Air Toolbox in the Resources section
 - a. Video marker 2:44 begins the discussion about creating the land formation cards.
2. After cutting the sandpaper into the four pieces use the templates below to trace the land formation onto the back for the sandpaper
3. Cut out the formation shape
 - a. e.g. Island: trace around the island template on the back of one of the sandpaper pieces.
4. Use an x-acto knife (or similar) to cut out the traced shape on the sandpaper.
 - a. This creates the pieces needed for two separate formation cards
 - i. e.g. Island tracing will provide the pieces for Island and Lake cards
5. Find the corresponding land formation cards (the front is solid blue and the back has the formation name)
6. Remove the adhesive from the back of the sandpaper pieces that you cut.
7. Adhere the corresponding shape to the appropriate land formation card.

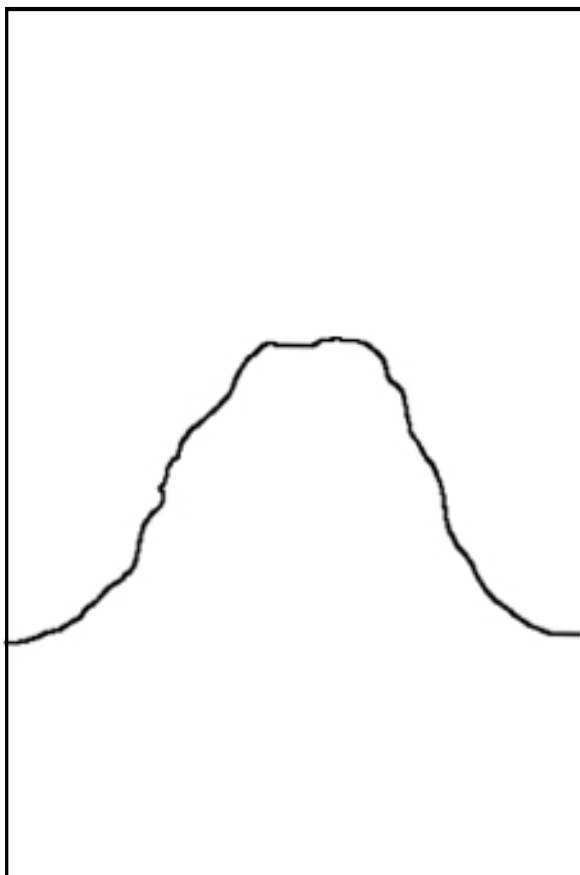

Strait / Isthmus

Island / Lake

Bay / Cape

*System of Lakes
